FRONTEND ENGINEER

A detail-oriented Frontend Engineer with 4 years of experience developing and maintaining web applications using modern technologies such as Typescript, Next, and Prisma. As a professional in startups and large companies, I've honed the skills necessary to efficiently deliver high-quality solutions that align with user and stakeholder needs.

EXPERIENCE

Full Stack Engineer II · Robert Half **11/2020 - Present**

- Contributing to replatforming and maintaining 20 global websites, resulting in a 25% increase in user engagement in the first 4 months of launch via collaboration with 5+ cross-functional teams.
- Expertly building a pivotal component library containing 100+ high-performance web components with 250+ variants and taking ownership of its release process.
- Minimizing production bugs and resolving bottlenecks by leading the research and implementation of processes to improve development and testing cycles.
- Fostering a collaborative and empowered team workspace by mentoring fellow team members, conducting simultaneous code reviews, and regularly offering support wherever needed.

Full Stack Engineer · Boonob **06/2020 - 11/2020**

- Conceptualized and executed user-friendly features, resulting in a 20% boost in user acquisition through collaboration with the business and production teams.
- Orchestrated the design and implementation of foundational REST API endpoints asynchronously in Node, instrumental in the company's early stages and gaining initial users.

Full Stack Engineer · Fanmire **01/2020 - 05/2020**

- Led the design and engineering of a web app aggregating social media content from Twitter, Facebook, and Instagram APIs into a dynamic, unified newsfeed, satisfying business requests.

Frontend Engineer Intern · Thinq.tv **05/2019 - 08/2019**

- Developed prominent features on the website's front page to capture user engagement while proactively looking for other opportunities to help, such as enhancing the website's performance.
